Night Drivers

COLLECTION

Night Driving Glasses

- *Yellow lens tint enhances contrast at night*
- *Anti-reflective coating reduces glare*
- *100% UVA/UVB protection*

Night Drivers have a unique and subtle yellow tint that allows drivers to distinguish between green, red and yellow traffic lights and pass the global standards for traffic light transmittance. The yellow lenses enhance contrast and the anti-reflective coating blocks glare.

- Yellow Lens Tint (400nm) Enhances Contrast
- Anti-Reflective Coating Blocks Glare
- 100% UVA/UVB Protection
- Passes Global Traffic Light Standards
- Non-Polarized for digital display legibility (i.e. dashboard, GPS)
- Blocks Blue Light from Headlights
- Light Transmittance 85%
- Scratch-Resistant lenses
- Impact-Resistant Lenses
- High Quality Nylon Frames
- Oleophobic coating repels oil, water and smudges
- Lenses meet ANSI Z80.3-2010: strictest UV blocking requirements
- Bend to Fit® Temples
