1 About LVI

LVI Low Vision International AB was founded in 1978 and is one of the world’s leading manufacturers of magnifying TV- and computer systems for visually impaired. New products are developed in close cooperation with users and professional personnel of vision rehabilitation. LVI is a Quality System Certified ISO 9001 and Environmental System Certified ISO 14001 company.

The information in this manual has been carefully checked and is believed to be accurate. However, LVI assumes no responsibility for any inaccuracies that may be contained in this manual. In no event will LVI be liable for direct, indirect, special, exemplary, incidental, or consequential damages resulting from any defect or omission in this manual. In the interest of continued product development, LVI reserves the right to make improvements in this manual and the products it describes at any time, without notice or obligation.
2 Introduction to the MagniLink S

Thank you for choosing this video magnifier. We aim to ensure that you are completely satisfied with your choice of supplier and reading aid.

The MagniLink S is a portable camera system with autofocus, which can be connected to a computer or directly to an external monitor. The system is controlled via a keyboard and/or control box. MagniLink S is available in a number of different models. Choose model in the following steps:

Choose reading camera HD or FHD.

<table>
<thead>
<tr>
<th>Model</th>
<th>Camera</th>
</tr>
</thead>
<tbody>
<tr>
<td>MLS-HD</td>
<td>HD (720p)</td>
</tr>
<tr>
<td>MLS-FHD</td>
<td>FHD (1280p)</td>
</tr>
</tbody>
</table>

Choose among the following accessories.

<table>
<thead>
<tr>
<th>Product code</th>
<th>Accessory</th>
</tr>
</thead>
<tbody>
<tr>

MagniLink S meets all the requirements for CE marking of medical devices in accordance with Directive 93/42/EEG. Our products comply with MDD 93/42/EEC with additions from Directive 2007/47/EC.
3 Safety information

The reading aid is only intended for indoor use and must be used in accordance with the following safety instructions.

- Use only the power adaptor supplied with MagniLink S. If the wrong type of adaptor is used for operation of MagniLink S, this can cause damage to the system.
- Units such as HDMI monitors and/or computers that are to be connected to the system must comply with the appropriate safety regulations for their country of use.
- Never turn on or use the product if it has been exposed to water, rain or other liquids. Pull out the USB cable and allow trained service personnel to carry out an inspection of the product before it is used again.
- Place the power cord in such a way that you can neither trip over it or that crush damages can occur.
- If the product is moved from the cold into a warm room, condensation (moisture) can form inside the unit or on the camera lens. To prevent problems with condensation, the apparatus should be installed in the room at least 30 minutes prior to usage.
- If the system requires cleaning, pull out all cables and use a slightly damp (not wet) cloth. Use only water or a cleaning agent that is intended for monitors and computers.
- Do not rely 100 per cent on the results of an OCR conversion; the OCR engine can misinterpret the text. This is particularly important to bear in mind when processing sensitive information such as a medical prescription.
- Make no further adjustments, even if the product does not function normally after following the functional descriptions. Pull out the USB cable and contact service personnel or the product distributor. Only use spare parts that are specified by LVI

If in doubt, contact your supplier.

Warning

MagniLink S is supplied packed in a plastic bag. To avoid risk of suffocation, keep the bag out of the reach of children and infants.
4 Unpacking

The system is supplied in a box with the following contents:

- Reading camera
- USB cables
- Case
- USB memory stick with software
- Polishing cloth
- User Guide
- Power adaptor
- HDMI to HDMI cable
- HDMI to DVI cable

Check first that the box has no damage to its exterior. In the event of damage, contact the delivery company and file a notification of damage.

Open the box and take out the MagniLink S; remove the white packaging. For further information see Installation.

4.1 Packaging

The packaging consists of the following packaging material (LVI recommends that the packaging be kept in case you have to return the system or you need to move it):

- Packing material (EPP)
- Box (corrugated cardboard)
- Polyethylene (LDPE4)

For sorting and collection of packaging material, please call the packaging collection customer service department for information on the rules that apply in your municipality.
5 Accessories

External control box (MLS-A100).

Larger external control box (MLV-A110A).
MagniLink Docking Station (**MLS-A101**), stationary reading table.

MagniLink Reading Table (**MLRT**), portable reading table.
LVI Monitor 19" (MLS-A103) and 23" (MLS-A104).

Text To Speech for PC (TTS-PC) or Mac (TTS-MAC).
6 Hardware

6.1 Installation of hardware

Open the camera's arm and pull out the camera's supporting legs. It is not possible to manipulate the camera's arm until the supporting legs have been extended.

On the back of the camera there are several connection options. The connection options available depend on the camera model.

1. **USB connection**
   In addition to transferring images to a computer, the USB connection is used to provide power to the system.

2. **HDMI connection**
   Here the camera can be connected to a monitor that supports HDMI or DVI.
3. **External control panel**
   An external control panel can be connected via this input.

### 6.2 Using the hardware

#### 6.2.1 Control box

![Remote control diagram]

1. **LED**
   A green light indicates that the system is on. A flashing green light means that the system is starting up. A slowly flashing yellow light indicates standby. A red light indicates that something is wrong in the system. See the chapter on Troubleshooting page 40.

2. **Power on/off**
   Press to start or shut down the system.

3. **Lighting configuration**
   Used to configure the light intensity in order to optimize reading conditions. Press the upper half to increase the light intensity and the lower half to decrease it. For systems that have LED lighting, the intensity is adjusted by holding down the button (7).

4. **Autofocus on/off**
   Press the button once to lock the focus. This can be used when you wish to write by hand. Autofocus is not affected by the pen or your hand. Press the button a second time, to reactivate autofocus.

5. **Zoom control**
   Used to set the zoom. To reduce the zoom, press the lower key (minus) and to increase the zoom, pressure the upper key (plus).

6. **Reference line/Bar**
   Adjust the position of the reference line. Press the right-hand
button to move the horizontal line down. Hold the button in to change the reference line to vertical and move it to the left. The reference line then becomes a horizontal bar which diminishes the viewing area. To make the bar vertical, press the button again. The left button gives the opposite result.

7. **Picture mode**
   Press the button to switch the picture mode between natural colours and grey scale.

   **Lighting adjustment**
   Hold the button down to temporarily enable adjustment of the lighting via the lighting configuration (3). When the lighting configuration (3) is used to adjust the lighting, there is no switching between colour and grey scale (only possible if the system has LED lighting).

   **Mirroring**
   A mirror image can be obtained by holding the button down for three seconds.

8. **High contrast modes with artificial colours**
   Press the key to switch between the various colour combinations.

   **Rotation**
   By holding the button down for three seconds, the image can be rotated 180 degrees.
6.2.2 Position sensor

MagniLink S is equipped with a position sensor that is used to switch between reading mode (the user points the camera down and flips the lens into place) and distance mode (the user opens the lens). The settings for both modes are automatically saved when you switch from one to the other.

Settings that are automatically saved for these modes are:

- Artificial colours
- Negative/Positive/Natural colours
- Light
- Magnification level
- Reference line/Bar
- Rotation of camera image
- Mirroring of camera image
7 PC software

The software works on Windows 7, 8, 8.1 and 10. The following pages describe the installation and use of MagniLink S for PC.

The MagniLink S software has been developed so that it does not affect or interfere with other software. It has been tested alongside other software to ensure there are no conflicts. However, LVI cannot guarantee compatibility with all other software as their methods are outside of LVI's control.

7.1 Minimum system requirements

- Microsoft Windows 7.
- 2 integrated USB 2.0 ports.
- i3 processor, 1 GB RAM (32 bit) 2 GB RAM (64 bit).

7.2 Recommended system requirements

- Microsoft Windows 7.
- 1 integrated USB 3.0 port.
- i5 or i7 processor, 4 GB RAM, external graphics card with at least 512 MB inbuilt memory.

LVI has tested the software on several computers without any problems, but there is no guarantee that the system will function on all computers that comply with the specifications. LVI recommends testing the software on the computer where the system is to be used, in order to ensure compatibility. Better performing computers will facilitate better camera performance.

7.3 Installation of software

NOTE

Installation requires administrator privileges on the computer in question and is performed on the user account currently in use.

Insert the USB stick containing the software into one of the computer’s USB ports. Start the installation by clicking on the "Setup" file, which can be found in the MagniLink S - PC folder.

When the installation program starts, follow the instructions on the screen to complete installation of the software, or see below for a more detailed description.
Select "Next" in the dialogue box "Welcome to the InstallShield Wizard for LVI MagniLink S".

Read the text in "License Agreement", approve this by selecting "I accept the terms of the license agreement" and click on "Next" to start the installation.
If you have a camera with OCR functionality, then mark the language(s) for which you have a license. If you do not have OCR functionality, then do not select any languages. Then click "Next" to continue with the installation.

Select “Install” in the dialogue box "Ready to Install the Program".
Select "Finish" in the dialogue box "InstallShield Wizard Complete".

7.3.1 Updating/removing software

Insert the USB memory stick containing the MagniLink S software into one of the computer's USB ports. Start by clicking on the "Setup" file in the MagniLink S - PC folder.

Read the instructions on the screen in order to select the appropriate action.

Select “Modify” to change the software.
Select “Repair” if there is a problem with the software.
Select “Remove” to uninstall the software.
7.4 Using the software

7.4.1 Functions via the keyboard

MagniLink S is shown as a MS Windows application and all functions can be managed via the keyboard. Various menus allow the short cut commands to be changed. Below are the standard settings for the short cut commands.

**F1**  
Natural colours

**F2**  
Positive image with heightened contrast  
Artificial colours; White/Black, Yellow/Black, Green/Black, Red/Black, Yellow/Blue, White/Blue. Press F2 repeatedly to switch between the various colours. (Shift + F2 to cycle backwards)

**F3**  
Negative image with heightened contrast  
Artificial colours; White/Black, Black/Yellow, Black/Green, Black/Red, Blue/Yellow, Blue/White. Press F3 repeatedly to switch between the various colours. (Shift + F3 to cycle backwards)
Take a "snapshot"
Press F5 to open the “Save pictures” dialogue box. A file name (with the day’s date and time) and a folder (My Pictures) are automatically suggested. Just press Enter to save the picture. If you wish to save the picture somewhere else, or with another name or in another format, (the standard is JPG), you can change this manually.

Take a quick "snapshot"
Press Shift + F5 to quickly take a picture and save it, without specifying a name or folder. This function saves the picture in My Pictures or in the folder most recently used for the F5 function.

Start/stop video recording
Press Ctrl + F5 to open the “Save video clip” dialogue box. A file name (with the day’s date and time) and a folder (My video clips) are automatically suggested. Press Enter to save with the suggested name. If you wish to save the video in a different folder, or with another name, you can change this in the dialogue box. Stop the recording by pressing Ctrl + F5.

Quickly start/stop video recording
Press Ctrl + Shift + F5 to quickly start video recording, without specifying a name or folder. The video is saved under “My video clips” or in the folder most recently used for the function.

Display mode for “snapshots”
Press F6 to view the saved pictures. Mark the picture you wish to view and press Enter or select Open. The picture is normally opened in Windows’ standard picture-viewing program where, amongst other things, the picture can be enlarged.

Immediately show the most recently taken "snapshot"
Press Shift + F6 to immediately show the most recently taken picture. If no pictures have been taken previously whilst the program has been running, the button will have the same function as F6.

Display mode for video
Press Ctrl + F6 to view saved video files. Mark the video you wish to view and press Enter or select Open. The video is normally opened in Windows’ standard media player software.
<table>
<thead>

<tr>
<td>Ctrl + Alt + S</td>
<td>Global short cut command (quick activation of MagniLink S). This command does not work immediately after the program has been installed. It is necessary to log out and then log in again in order for it to work. If it still does not work, this may be due to a conflict with another installed program. You can change this short cut command by right-clicking on the MLS icon on the desktop, selecting Properties and then changing the last letter in the short cut commands field.</td>
</tr>
<tr>
<td>F12</td>
<td>Open the manual. This key combination opens the manual pages in the standard application for viewing pdf-files.</td>
</tr>
</tbody>
</table>
The following functions are only available together with cameras that support OCR.

**F4**

**OCR-process**

This command takes a picture for OCR-processing. The program then switches to text view and the OCR-processed text is read aloud. If the text view already contains text, this is replaced by the text from the OCR conversion. See for more information.

**Ctrl + F4**

**Process with OCR and add text**

Works like the previous command, but the text from the OCR conversion is added to the existing text. See for more information.

**Ctrl + S**

**Toggle column selector**

Activates or deactivates the column selector. When the column selector is active, only those columns that are intersected by the column selector are OCR-processed.

**Ctrl + C**

**Copy image or text**

Copy the camera image or all text in the text view to Windows Clipboard. If the text view is active the text is copied otherwise the camera image is copied. It is then possible to paste the content of the clipboard into another program, such as Word.

**Ctrl + V**

**Paste text**

If the user has copied text from another program, this text can be pasted into the text view. This command replaces the existing text.

**Ctrl + Shift + V**

**Paste and add text**

Works like the previous command, but the text is added to the existing text.

**Alt + F6**

**Open text document**

A dialogue box opens. Select the .txt file in the dialogue box that is to be opened and press Enter or select Open.

**V**

**Switch between camera view and text view**

If a text has been OCR-processed, this command switches between camera view and text view.

**B**

**Display mode**

Switches to display mode for OCR-processed text. The available display modes are: Side view, line view, word view and a silent mode where the text moves sideways on the screen.
1. **Start/Pause reading**  
If no reading is currently in progress, reading starts, otherwise reading is paused.

2. **Stop reading**  
This command stops the reading. The next reading will begin from the start of the text.

3. **Read previous**  
With this command, the user can go backwards through the text. If the reading mode is set to character, one character is read for each keystroke. If the reading mode is word, you move backwards through the text word by word. If the reading mode is sentence, you move backwards through the text one line at a time.

4. **Read next**  
With this command, the user can move forward in the text. If the reading mode is set as character, one character is read for each keystroke. If the reading mode is word, you move forward through the text word by word. If the reading mode is line, you move forward through the text one line at a time.

5. **Switch reading mode**  
This command selects the reading mode that is to be employed when the "Read previous/next" command is entered. There are three modes: character, word and line.

6. **Slower**  
Reduces the reading speed.

7. **Faster**  
Increases the reading speed.

8. **Reduce volume**

9. **Increase volume**

0. **Next voice**  
Switches to the next installed voice. This command also changes the OCR engine's language to the new voice's language.

The following functions are available when MagniLink S is used together with ZoomText or SuperNova:

- **Shift + Up arrow**  
Moves the split screen mode to the left/up.

- **Shift + Down arrow**  
Moves the split screen mode to the right/down.
7.4.2 Functions via menus and buttons

The application can be controlled via menus or buttons.

- To access the menus, move the cursor to the top left corner of the application. The "Menu" button will then be displayed. Click on this to access the menus.
- To access the buttons, move the cursor to the top right corner of the application. The button with a gearwheel will then be displayed. Click on this to access the other buttons.

7.4.2.1 Functions via menus

The menus contain settings for the application.

- **Application**
  Contains general settings for the application.

- **Video**
  Settings that shall apply for video are set here.

- **Recording**
  Here are recording settings.
- **OCR**
  Contains settings for the OCR engine.

- **Speech**
  Here you can access settings for reading.

- **Short cut commands**
  Click here to change the short cut commands.

- **About**
  Click here if you require information regarding the software version in use and your license.

* Only cameras that are licensed for OCR.
7.4.2.2 Functions via buttons

The buttons let the user control the program. Below is a description of what they do.

1. Shows the camera image in natural colours or in black and white.
2. Shifts between the MagniLink camera's artificial colours.
3. Switches between autofocus and locked focus modes.
4. Zooms out.
5. Zooms in.
6. Switches between the pre-set split screen modes.
7. Starts the reading of OCR-processed text. Press once - the text will be read aloud. Press again - reading is paused*.
8. Stops the reading of OCR-processed text. The next reading will begin from the start of the text*.
9. Increases the light intensity in natural colours or raises the contrast level in artificial colours.
10. Reduces the light level in natural colours or lowers the contrast level in artificial colours.
11. Begins OCR-processing of the image shown. When the OCR-processing is complete, the program switches to text mode and the OCR-processed text is read aloud*.
12. This button switches between camera view and text view*.
13. Switches to display mode for OCR-processed text. The available display modes are side view, line view, word view and a silent mode where the text moves sideways on the screen*.

* Only cameras that are licensed for OCR.
7.4.3 Information and settings window

The Information and settings window consists of a number of different tabs that contain application information and alternative settings.

7.4.3.1 Applications Settings

![Settings window]

Activate CCTV interface
By activating this function, MagniLink S is able to work with the magnification software from Dolphin and AiSquared. MagniLink S is compatible with ZoomText version 10 and with SuperNova version 12 or more recent. We recommend deactivation of the CCTV interface when working with older versions of the programs mentioned above.

Activate automatic updates
MagniLink S will automatically search for new versions of MagniLink S software. You can also deselect this and update manually instead (note: Internet connection is required for both automatic and manual updating).

Search for updates now
Press OK to search for updates (requires Internet connection.)
Language

The system is set to use the computer's standard language. If the language is not available for MagniLink S software, English is automatically chosen as the standard. Languages can be changed manually under Application Settings.

Available languages:

- English
- German
- Danish
- Spanish
- Finnish
- French
- Dutch
- Norwegian
- Swedish
7.4.3.2 Video Settings

Resolution
Select from the camera’s various resolution options. The best picture quality is achieved by selecting the highest resolution. Lower resolutions may be required if the application is used on a computer with a lower level of performance.

Frame rate
This setting lets the user limit the frame rate. For the best video quality, the frame rate should be 60 Hz, but it may be appropriate to set the frame rate at 30 Hz for computers with a lower level of performance.

Rotate image
Allows you to set the rotation angle of the camera image. MagniLink S supports rotation of the camera image to the following angles: 0°, 90°, 180° and 270°.

Mirror image
When this function is active, the camera image is mirrored.
Use position sensor

When this function is active, the application remembers the user’s settings for reading and distance modes. See the Position sensor page 16 for more information.

7.4.3.3 Recording Settings

![Recording Settings UI]

Limit the duration of recording
Activate this function if you wish to limit the duration of the recording.

Duration in minutes
If you have chosen to limit the duration of the recording, you can set the maximum duration in minutes from 1 to 60.

Frame rate
Frame rate of the recording, the number of images that can be recorded per second, can be set from 1 to 30 (1 to 24 images per second when the program runs together with ZoomText). A lower frame rate provides poorer quality on the recorded video, but takes up less space on the hard disk.

Record sound
If your computer is equipped with a microphone, (internal or external) sound can be added to your video recording.
Sound source
Select which microphone is to be used for video recording with sound. Normally only one sound source may be selected.

Carefully read the following information before using the video recording function.

The MagniLink S software can record video sequences from the MagniLink S camera in Windows Media Video (.wmv) format. It is possible to record video with or without audio. The video recording is started with the keyboard (Ctrl + F5) and a red indicator is displayed at the bottom right of the video window while video is being recorded.

The camera image is viewable in the application window while recording video, but since the video recording is quite CPU demanding, the frame rate of the camera is lowered to 30 Hz while the recording is in progress. This will affect the camera image quality compared to the image quality of 60 Hz frame rate. Since the video recording is relatively CPU demanding, the quality of the recorded video can vary on some computers. In that case, the recording frame rate can be lowered to reduce the CPU load.

There must be 50 MB of free disk space in which to save the file when a video recording starts. If, while recording, the disk space falls below 50 MB, the video recording stops automatically. 1 minute of video at 10 Hz takes about 20 MB of disk space. We recommended that you always save the files on the local hard disk and not move them to another folder until the video is finished.
7.4.3.4 OCR Settings

This settings tab is only visible if the camera supports OCR.

![OCR Settings](image)

**Typeface**

Here the user can set the typeface used for viewing text that has been OCR-processed. The typeface in use has no effect on the OCR-processing.

**Column mode**

When this setting is active, the OCR engine processes the text in columns, which is appropriate if it is a newspaper text that is to be processed.

**Start speech after OCR**

If this box is ticked, text will automatically be read aloud after an image has been OCR-processed.

**Smart start**

Smart start works as follows. If a text has already been read aloud and a new OCR conversion is starting, the reading will start from the position where the reading of the old text stopped.
Automatic language detection

When this function is active, the application will try to detect the language of the text and change the voice to the detected language. Automatic language detection will only work for those languages for which the application has licensed voices. If a text on a different language is to be OCR-processed, then this function needs to be deactivated.

7.4.3.5 Speech Settings

This settings tab is only visible if the camera supports OCR.

![Speech Settings Window]

Voice
If several voices are available, the user may select from these.

Volume
Set the sound level for the voice.

Speed
Set the speed of the voice.
7.4.3.6 Settings for short cut commands

Here the short cut commands used for the application can be changed. To change a short cut command, tab to the command that is to be changed and enter the new keyboard combination. If a combination already being used for another command is entered, the second command will be erased. A new keyboard combination will need to be entered in order to change the command.
7.4.3.7 About the application

Information regarding the software version and copyright can be found under this tab. If there is no Internet connection, press the "Enter license" button to license the software.
8 Working with the reading camera

Your reading camera is now ready to use. It is important that the workplace around your MagniLink is comfortable, and that you sit correctly. This is so that you can use the camera for as long as possible without putting undue strain and stress on your neck and back.

You should bear the following in mind:

- Your chair should be positioned close to the table on which the equipment is located, and you should not sit in the chair for too long. We recommend a good office chair with adjustable height.
- The seat of the chair should be at a height that does not cause your legs to become numb; legs should be at an angle of 90 degrees and you should rest your feet on the floor.
- The reading table should be at a height at which you can rest your lower arm horizontally on it. It is important that the table is neither too high nor too low for you. The ideal solution is if the screen is slightly below eye level and in as straight a line in front of you as possible.
- Shut out daylight. Lights in the ceiling, table lamps and light from windows can cause reflections on the monitor. For this reason, avoid placing lights where they shine directly at the screen or at yourself.
9 Troubleshooting

If the indicator light is flashing:
A red light or a flashing red light indicates a system error. Restart the system by disconnecting and reconnecting all cables and rebooting the system. If a red light is still displayed, contact your service technician.

**Disposal of old electrical and electronic equipment (applies for EU countries and all other European countries that have specific collection systems)**

If the product or its packaging has this symbol on it, it is not to be handled as regular domestic waste. It should instead be deposited at a suitable collection centre for the recycling of electrical and electronic equipment. By ensuring that this product is properly taken care of, you are helping to prevent the negative impact on health and the environment that might otherwise result from inappropriate disposal of this product. Recycling helps in the management of our natural resources. For more detailed information regarding the recycling of this product, you can contact your municipality, your waste management company or the store where you purchased the product.
11 Declaration of Conformity

DECLARATION OF CONFORMITY

according to the Medical Devices Directive, 93/42/EEC with amendments from directive 2007/47/EC

Type of equipment: Reading Aid
Brand name or trademark: MagniLink
Type designation: MLS-HD, MLS-FHD
Product class: Class 1.
Manufacturer: LVI Low Vision International AB
Address: Verkstadsgatan 5
S-352 46 Växjö
Sweden
Web: http://www.lvi.se
Phone: +46 470 - 72 77 00
Fax: +46 470 - 72 77 25

As the manufacturer, we declare under our sole responsibility that:

➢ we will keep the technical documentation described in section 3 of Annex VII available to the national authorities for a period ending at least five years after the last product has been manufactured.
➢ the device meets the Essential Requirements of Annex 1 which applies to it, taking into account the intended purpose of the device.
➢ to follow the requirements regarding products placed on the market as described in section 4 of Annex VII.
